Integral Motor Mounts

A new Integral Motor Mount is available for use with DM1X and DM2 motors. This mount provides an extremely compact and lightweight means of securing lens drive motors to the matte box rods. The mount consists of two parts; a replacement motor end cover with rosette gear and a short swing arm. The short swing arm has a rosette gear which securely mates to the motor cover while the other end clamps to the 19mm matte box support rods. Standard reduction bushings are available for use with 15mm and .625" rods.

DM1X and DM2 motors can be ordered with Integral Motor mounts and swing arms as a standard option or the Motor Mounts and Brackets can be ordered separately for retrofitting existing motors.

P/N	Description
4201A	DM2 digital motor complete with integral motor mount.
4205A	DM1X digital motor complete with integral motor mount
4309	Integral Motor Mount for DM2
