

Micro Force Articulating Pan Arm Adapter

The **Articulating Pan Arm Adapter** attaches the Micro Force zoom control to either a 18mm or 3/4" diameter pan arm. The articulation angle is adjusted by a threaded handle; because the pair of rosette gears is offset from the body of the Micro Force, complete 360° rotation is possible.

The unit comes complete with the adapter body and both a 18mm and 3/4" tube. The adapter body is compatible **only** with the Micro Force V+F2 and Digital Micro Force models.

Order Information

1155 Articulating Pan Arm Adapter with tubes for 18mm and 3/4" arms
